Notes:
 1. all high school or middle school paddlers must be accompanied by a launch at all times and in all conditions

2. Safety items to be included in each launch under all conditions : one space blanket per rower or paddler, and bailer or pump. In rough water, one pump recommended in each DB

3. Precaution should be taken in this Zone 3 as the flowrates are higher and the water temperatures are colder. Paddle with flat water and low or no wind present and with recreational traffic not causing wakes. Stay closer to the island where help may be more available. Consider a using launch especially as the water temperatures get below 55 F.
 This Zone requires an experienced helm and should have a Launch or a Rescue Boat on the initial attempts.

4. A rescue boat may be another DB with a minimum of 10 paddlers. When a DB is used as a Rescue Boat it is restricted to within 1 mile of the island.
